Three more!

Instructions for preparation

1. Print the number cards. I recommend using cardstock and laminating so they will last longer.
 2. Print the student game boards. There are five different game boards. They all use the same numbers, but in a different order. Up to five students can play at a time. Put the game boards in page protectors, or laminate, for longer use.
 3. You need some discs, buttons, pieces of paper, etc. To cover the squares on the game board. Alternatively, use dry erase markers if you chose to put the game boards in page protectors or laminated them.
-

Game Instructions

1. Provide each student with a game board and a dry erase marker or pile of chips for covering spaces.
2. Put all of the number cards face-down on the table.
3. The first player selects a card and says the number that is three more than the number on the card. The other players verify the answer. Then ALL of the players cover that number on their game board..
4. The next player continues, repeating step 3. Continue playing until someone has five in a row, in a column, or diagonally. This person is the winner.
5. Clean off the game boards and play again, or leave them for the next group of students.
